

Windows Server 2022 Infrastructure and Active Directory Administration Lab

Windows Server 2022 Deployment and Active Directory Administration

Lab Overview

This lab covers the installation and configuration of Windows Server 2022 in a virtualized environment using Oracle VirtualBox. Practical experience was gained in server deployment, Active Directory Domain Services (AD DS), Domain Controller configuration, Organizational Unit (OU) administration, user account management, password administration, and basic Windows Server management tasks.

Topics Covered

- Windows Server 2022 Installation
- VirtualBox Configuration
- Server Initial Configuration
- Computer Renaming
- Static IP Address Configuration
- Remote Desktop Configuration
- Time Zone Configuration
- Windows Updates
- Active Directory Domain Services (AD DS) Installation
- Domain Controller Promotion
- DSRM Password Configuration
- Organizational Unit (OU) Creation
- User Account Creation
- Password Reset Administration
- Account Disable and Enable
- Account Unlocking

Conclusion

This lab demonstrated practical administration of Microsoft Entra ID including identity management, user lifecycle management, authentication security, and access control.

Send diagnostic data to Microsoft

Choose your settings, then select **Accept** to save them. Check the **Learn more** link for info on these settings, how to change them, how Windows helps protect you from unsafe apps and web content, and the related data transfers and uses.

Include Optional

Send info about how you use apps and features, plus additional info about device health, device and web activity, and enhanced error reporting. Diagnostic data is used to help keep Windows and other Microsoft products secure and up to date, troubleshoot problems, and make product improvements. Required diagnostic data will always be included when you choose to send Optional diagnostic data. Regardless of your choice, your device will be equally secure and will operate normally.
